Amir Suleimanov

Full-Stack Developer · Java / Spring Boot + React · Tech Lead

Bishkek, Kyrgyzstan · suleimanovamirbk@gmail.com · t.me/suleimanovdev · linkedin.com/in/suleimanovamir · github.com/Sotonush

SUMMARY

I build business systems from zero to production: CRM, online stores, multi-tenant SaaS. I lead projects as a tech lead: architecture, backend, frontend, deployment.

EXPERIENCE

Full-Stack Tech Lead — Ichiban (contract)

Jun 2026 – present

CRM and online store with a full ecosystem, built from scratch, launching soon

- Architecture and backend from zero: Java 21, Spring Boot 4, PostgreSQL, Redis, Flyway; 60+ REST controllers.
- Full order lifecycle: from checkout to purchasing, warehouse, delivery and returns.
- Delivery service and payment provider integrations, multi-currency.
- Online store and customer account, real-time chat with managers.
- Partner program, finance and analytics.
- Roles and permissions, JWT, audit log; leading the frontend and the team.

Full Stack Engineer — Unicorn Soft LLC

Jul 2025 – May 2026

SaaS for private medical clinics, built from scratch as part of the team

- Access model: roles, permissions and data access rules across the system.
- Authentication and authorization: Keycloak, JWT, MFA.
- Inpatient module from scratch, part of the laboratory module.
- Cashier module: backend and frontend.
- Integrations with the tax service and 2GIS.

Backend Developer — Freelance

2025

- WhatsApp messaging service for dental clinics without the official Business API.
- AI chat assistant answering patients in WhatsApp.

Java Developer — Produmano

Feb 2025 – Jul 2025

- Full authentication flow: Keycloak SSO, JWT.
- Telegram bot for notifications, reminders and FAQ answers; frontend of the order management website.

Frontend Developer (internship) — Js Soft

May 2024 – Feb 2025

- Frontend of a website for a major medical company from China.

Own product — multi-tenant SaaS

2026 – present

- Company data isolation with Hibernate `@TenantId`; 220+ tests, integration tests on Testcontainers.
- CI/CD: GitHub Actions → GHCR → VPS, Docker, Caddy with automatic SSL; several React/TypeScript frontends.

SKILLS

Backend	Java 21, Spring Boot, Spring Security, Hibernate/JPA, PostgreSQL, Redis, Flyway, Keycloak, JWT
DevOps	Docker, GitHub Actions, Caddy, Linux
Testing	JUnit, Mockito, Testcontainers
Frontend	React, TypeScript

EDUCATION

Professional Lyceum of Information Technology No. 99 — Web Programmer. IT Fest 2024 hackathon — team lead of 4 developers.
